

Remarks

Reconsideration of the above-captioned application is respectfully requested. Claims 1, 2, 4-6, 8-10, 12-14, 16-19, 22-32, and 34 have been rejected under 35 U.S.C. §102 as being anticipated by Bogward, USPP 2004/0049743, and Claim 20 has been rejected under 35 U.S.C. §103 as being unpatentable over Bogward in view of Zak, USPP 2002/0004729. Claim 31 has been rejected under 35 U.S.C. §103 as being unpatentable over Bogward in view of Retter, USPN 5,825,362, and Claim 33 has been rejected under 35 U.S.C. §103 as being unpatentable over Bogward in view of Dardick, USPP 2002/0075317.

To overcome the rejections, independent Claim 1 has been amended to specify that the display and the touch-sensitive display present two adjoining display portions of a single display output at a first time, but only the display but not the touch-sensitive display present the two adjoining display portions of the single display output at a second time. The only other remaining independent claim (8) now specifies that the single display output is selected from the group of outputs including: a map, a computer drawing, a spreadsheet. Support for these amendments can be found in the present specification on page 14, first two paragraphs.

It is believed that none of the relied-upon references teach the features added by this amendment, rendering the claims patentable.

The Examiner is cordially invited to telephone the undersigned at (619) 338-8075 for any reason which would advance the instant application to allowance.
